## **DETAILED ACTION**

### ***Drawings***

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the lines are not uniformly thick and well defined, clean, durable and black (poor line quality). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: Note that 37 CFR 1.52(b)(1)(ii) requires the application to be in the English language. The examiner believes the use of the word "liaisons" to be a word used in French.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The current claims recite "liaisons" which is not an English recognized word. Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written

Art Unit: 3715

description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term “liaisons” in claims 1, 2 & 6 is used by the claim to mean “the pronunciation of a latent word-final consonant immediately before a following vowel sound. In French, most written word-final consonants are no longer pronounced and are known as latent or mute”, while the accepted meaning is “communication between two or more groups and/or co-operation, working together.” The term is indefinite because the specification does not clearly redefine the term.

### ***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 2 & 6 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In order for a method claim to be statutory it must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. These claims currently recite purely mental steps. Please refer to MPEP 2106.IV.B. for further clarification.
